

ANTI-SEIZE SA 610

PRECISE PERFORMANCE FROM EXTREME COLD TO EXTREME HEAT

An anti-seize paste optimised for fasteners used in high temperature power generation and aerospace systems.

- ▶ Outstanding temperature range -40°C to +1000°C
- ▶ Provides controlled friction on assembly, enabling precise tensioning.
- ▶ Protects fastener surfaces from galling and seizure, providing controlled release.
- ▶ Optimised for high temperature superalloys, Inconel, stainless steel and silver coated fasteners.

TEMP RANGE
-40°C to +1000°C

Part Code	Size
14153	500g
