

SHAWSTON INTERNATIONAL PRIORITISES PROTECTION WITH SAFE-T-DROP SYSTEM FROM BEVAN GROUP

Shawston International is the UK’s largest, employee-owned distributor with national depot coverage and deep stocks to service the Mechanical Services, Fire Sprinkler and Dry/Wet Riser markets.

Shawston International can trace its roots back to the early 1970s, but has always leased its trucks and vans. The decision to change tack by purchasing the latest additions to its 25-strong fleet represents the beginning of an exciting new phase in the development of the business – its ambition now, is to own all of its vehicles.

Colleagues climbed aboard one of the vehicles to provide the solution to a celebratory challenge which had engaged the entire company. None were at risk of injury, though, because both vehicles are fitted with Bevan Group’s patented Safe-T-Drop system.

Shaun Imrie, Shawston International’s Group Head of Operations & Compliance, confirms: “We take great pride in our commitments to safety and compliance, and Bevan’s working-at-height system is definitely the best I’ve seen.”

“These smartly branded new trucks represent a significant investment, but after five years they will start adding serious value to our business,” continues Shaun Imrie. “We’re confident we can get 10 years of use from them, and our previous experience of Bevan Group’s hard-wearing build quality leaves us in no doubt that its latest bodies will stand that test of time.”
