

ROCHFORD ENGINEERING

ABOUT

Formed in 1980 Rochford has been supplying our customers with high quality metal components and pressings ever since. Our dedicated, experienced and long-serving workforce are committed to providing Quality and Excellence in Metal.

We offer a variety of services including – Welding, Fabrication, CNC Machining, Laser Cutting, Wire Forming, Presswork, and Thread Rolling all in a range of finishes for all batch sizes at the best prices.

We work with clients in a broad spectrum of industries, ranging from automotive, agriculture and rail to construction, retail and leisure. All backed up by our ISO 9001:2015 accreditation.

MIG, TIG, spot welding, & brazing capabilities for small batch requirements through to production quantities in mild steel & stainless steel.

WELDING & FABRICATION

We have MIG, TIG, and brazing capabilities for small batches through to production quantities and stillage work in mild steel and stainless steel. We are your one-stop shop for fabrication work.

We understand materials and engineering problems, so you can be confident that we will provide the right engineering solutions for you. Our skilled and coded welders are experienced in welding complex assemblies for a variety of applications.

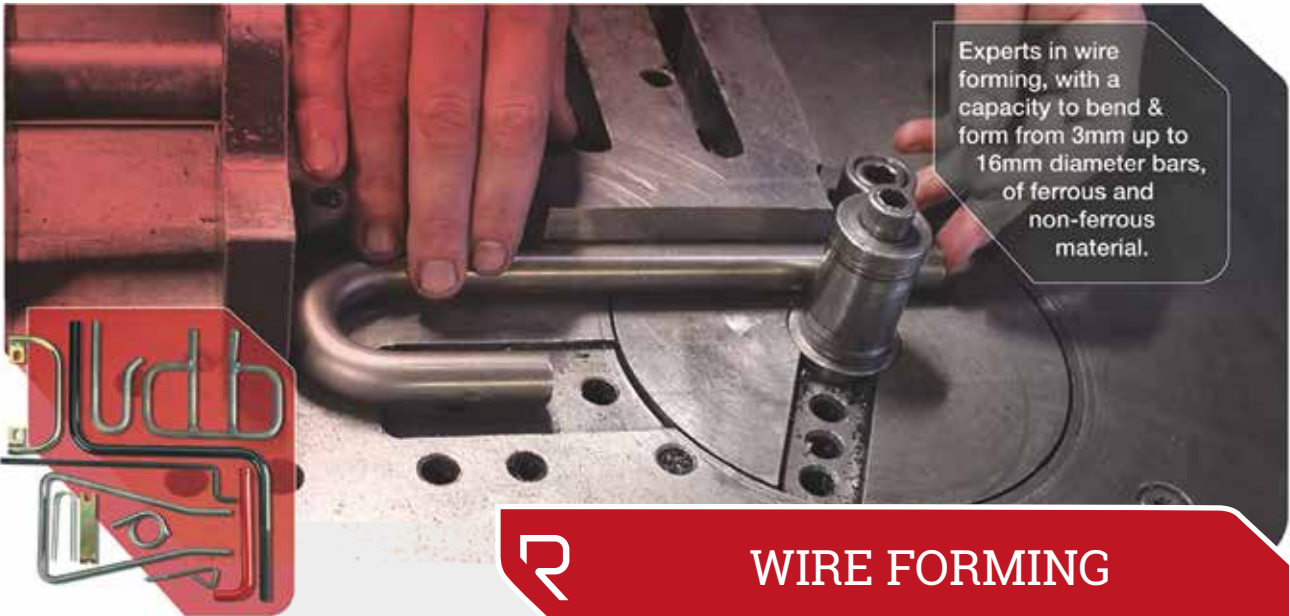

Hurco CNC TM6i lathe with 12 station tool turret a generous CNC turning diameter & turning length for a wide range of part sizes.

MACHINING

Our Hurco CNC TM6i lathe has a 12 station tool turret with a generous CNC turning diameter and turning length giving us the flexibility to work a variety of materials at the very best price.

This fast machine keeps cycle times short to ensure you meet your deadlines. Maximum bar capacity is 45mm, with a maximum turning diameter of 316mm and a maximum turning length of 340mm. The single-piece bed casting ensures outstanding quality.

Experts in wire forming, with a capacity to bend & form from 3mm up to 16mm diameter bars, of ferrous and non-ferrous material.

WIRE FORMING

We are experts in wire forming and can bend and form 3mm - 16mm diameter bars, of ferrous and non-ferrous material. With our low tooling costs, we deliver a fast, cost-effective service.

Our wire bending machines, have 2D and 3D wire forming capability. We can produce bent wire and steel strip components, wire formed shapes, wirework, wire fabrications and complex assemblies.

Bespoke metal presswork to suit requirements with a range of presses from 5 tonne to 40 tonne capability, in both ferrous & non-ferrous metals.

PRESSWORK

With a range of presses from 5t – 40t capability, we can provide an extensive choice of high-quality presswork, producing many different types of components in both ferrous and non-ferrous metals.

All our presses can blank, pierce, form and draw, on strip and cut blanks, which can then be assembled or welded in-house if required.

You can be confident that you will receive an unrivalled service from us. We are experts in all aspects of metal presswork, offering bespoke metal presswork to suit your requirements.

LASER CUTTING

For a cost effective solution to all your cutting needs, our Laser Cutter offers high precision, quality and accuracy.

With high speed cutting of mild steel up to 10mm in thickness, we are able to service all types of industries and you can be sure that the highly detailed capabilities of our machine provides top class cutting quality.

Contact us today to find out more about our welding and fabrication services or to discuss your requirements with us.
