

Looking for a rewarding career as an apprentice in manufacturing?

JOIN UNISON LTD - A MAJOR EMPLOYER IN YOUR AREA

Unison Ltd has been providing tube bending solutions for over 40 years working closely with our customers to design and build some of the most cutting-edge tube bending technology available in the global marketplace today.

Our apprentice programme is designed for enthusiastic individuals who want to work towards an exciting career in our ambitious and exciting organisation as an apprentice. You'll get the chance to gain practical experience and learn new skills with the complete support and guidance of your manager, a dedicated buddy and training provider.

Our apprenticeship programme lasts up to four years, dependent on the qualification you work towards. We'll support you throughout the programme and you'll be offered lots of exciting opportunities to stretch and grow in a way that helps you reach your full potential.

An apprentice at Unison Ltd is a great way to get hands-on experience while achieving a nationally recognised qualification. As a Unison Ltd apprentice, you will:

- Be employed from day one
- Be given a structured and interactive training plan, giving you a clear understanding of the whole business and your role within it
- Earn while you learn
- Work alongside experienced staff
- Receive support throughout your programme
- Study towards a related nationally recognised qualification
- Gain additional skills through enhanced learning opportunities
- Enhance your career opportunities with a fast paced, successful and expanding company
- Be given a network of fellow apprentices to share your journey with
- Be given study time to work towards your qualification

WHAT OPPORTUNITIES ARE AVAILABLE AT UNISON LTD?

- Electrical Design Apprentice
- Mechanical Design Apprentice
- Software Design Apprentice
- Machining Apprentice
- Welding Apprentice
- Electrical Panel Wiring Apprentice

Spaces on our Apprentice Programme are limited so we encourage you to apply as soon as you can.
To apply please email: enquiries@unisonltd.com.

PASSIONATE ABOUT THE FUTURE

Since 1973 we have been “home-growing” our team through our apprenticeship programme. In 2013 Unison embarked upon a very special journey. With key partners, they collaborated to plan and open an engineering academy. In 2016, the Scarborough partners from both the public and private sectors, opened what is now known as Scarborough UTC. We work closely with Scarborough University Technical College (UTC) to offer hands-on work experience to the students through projects and site visits. By working closely with students throughout their studies and supporting them through further and higher education we hope to be able to offer a full range of business and engineering, high-level apprenticeships to Scarborough UTC graduates.

INSPIRING YOUNG NEW MINDS

Driven by the desire to inspire and nurture the Engineers of tomorrow, Alan Pickering (Joint Managing Director of Unison) and Peter Wilkinson embarked on a mission to promote the range of career opportunities within the STEM industry and improve recruitment in the sector. With the help of Scarborough Business Ambassadors, Scarborough Science & Engineering Week was born, which attracts over 2,500 students each year from primary, secondary schools and colleges for three action-packed days of activities.

WHAT DO OUR CURRENT APPRENTICES THINK?

“There’s still a misconception that careers in engineering are all about heavy, dirty work, and that puts lots of girls off. But it’s just not true.”

“The training is amazing, I’m learning every day on the job and my skills are always improving.”

“One of the best choices I’ve ever made, not only am I in full-time employment but I’m also getting an education without the debt of University like my other friends.”

“There’s always an opportunity to improve my skills, knowledge and experience.”

“Having the chance to expand my mechanical knowledge and understanding is what I enjoy most. I have also really enjoyed travelling to America as part of my role working in the installation team.”

“I feel the apprenticeship Unison Ltd offers is in another league compared to many apprenticeship opportunities.”
