# The Home of Engineering Essentials

Since 1976 we have been one of the UK's foremost value-added suppliers of leading-brand engineering components, consumables, and related support services. Our purpose is to enable our customers to maintain operations, strive for operational efficiencies, whilst improving the safety of personnel.

## ✓ Your Trusted Partner

We are a trusted partner of choice for 10,000's of maintenance, engineering and purchasing professionals across the UK. Servicing a wide variety of industry sectors where mechanical and electrical infrastructure or personal safety forms a critical component of their operations.

## ✓ A Team of Time-Served Professionals

The organisation comprises of a growing team of over 1,000 professionals that includes time-served engineers with hands-on mechanical and electrical experience, through to qualified purchasing professionals that understand modern procurement management techniques and processes.

## ✓ Going Further than Component Supply

We work closely with our supply partners to go much further than component supply. In many cases working in collaboration to solve complex customer challenges.

## ✓ Local and National Coverage

We provide a complete 24 hours a day, 365 days a year service from our expanding network of over 50 branches and specialist centres; covering every corner of the UK.

# Our Profile

## STOCK /

Thousands of leading brand engineering components and consumables for same and next-day delivery. Ensuring our customers have the product they need, when they need it.

## SERVICE /

We continue to invest within digital technology, specialist personnel and engineering facilities to go much further than component supply. Ensuring your business is fit for the demands of today, and the challenges of tomorrow.

## PEOPLE /

Hayley Group was founded on the philosophy of entrepreneurial spirit and autonomy. Enabling our staff to have the flexibility to make decisions in the best interest of our customers.

# Thousands of Leading Brand Products

You can be confident that the products you buy from us are 100% genuine, sourced directly from leading manufacturers, ensuring both product reliability and performance. We have a high degree of purchasing power with these manufacturers, enabling us to keep our offer very competitive.

Our staff can identify a suitable replacement for your current components via part numbers or visual inspection. Where a product is not stocked, or cannot be sourced, we have a select number of manufacturing partners within each of the product categories that can manufacture to your exact specification.

## BEARINGS

Over 5 million bearings in stock across 40,000 SKU's, making us the number one choice for bearings and associated products.

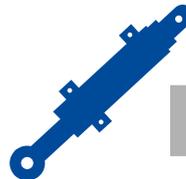

## POWER TRANSMISSION

We have hundreds of thousands of power transmission products in stock across our branch network. You can be confident that we have the product you need.

## SEALS

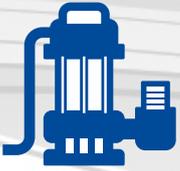

We are recognised as a leading provider of sealing solutions for both MRO and OEM. Having millions of sealing products in stock nationally.

## FLUID POWER

Being members of the British Fluid Power Distributors Association (BFPDA), we pride ourselves on being a true single source fluid power technical partner.

## PUMPS

Supported by a team of field-based pump specialists, our branches offer a comprehensive pump specification, supply and repair service.

## GENERAL MAINTENANCE

We stock an extensive range of key consumables for same and next day delivery, or collection across our entire branch network.

## LUBRICANTS

Our branches are supported by a team of industrial lubricant experts. We can match OEM specifications and performance levels through to advising on lubricants for specialist applications.

## PPE

Leading brand personal protective equipment that enables you to stay safe and compliant, supported by a dedicated team of experts.

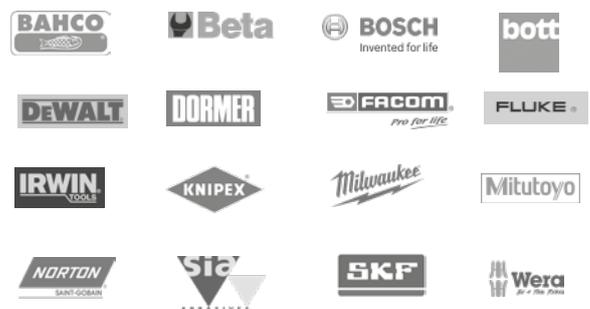

## DRIVES

Partnering with many of the world's leading manufacturers, our dedicated team of experts provides first-class technical support.

## TOOLS

Our direct relationships with manufacturers enable us to offer enhanced lead times across tens of thousands of stock and non-stock items.

## FASTENERS

With a wealth of experience and expertise our staff are able to source international standard fasteners, whatever size, material or quantity.

# Work Smarter with Our Services

We understand that providing quality products is only one element of a total industrial supply solution. Our service provision is an increasingly important part of our strategy. We continue to develop and launch new services that offer real-world benefits for our customers, whether that is reducing total cost of ownership, improving operational efficiency, maintaining regulatory compliance, or reducing the impact upon the environment.

## Industrial Vending

SmartVend from Hayley Group is the very latest in industrial vending technology, specified, installed and maintained by a dedicated in-house vending solutions team. The technology provides businesses with a lean, controlled flow of product to the point of use.

- ✓ Control wasteful usage
- ✓ Reduce inventory
- ✓ Minimise walking and waiting time
- ✓ Track usage by a variety of different metrics
- ✓ Automate reordering

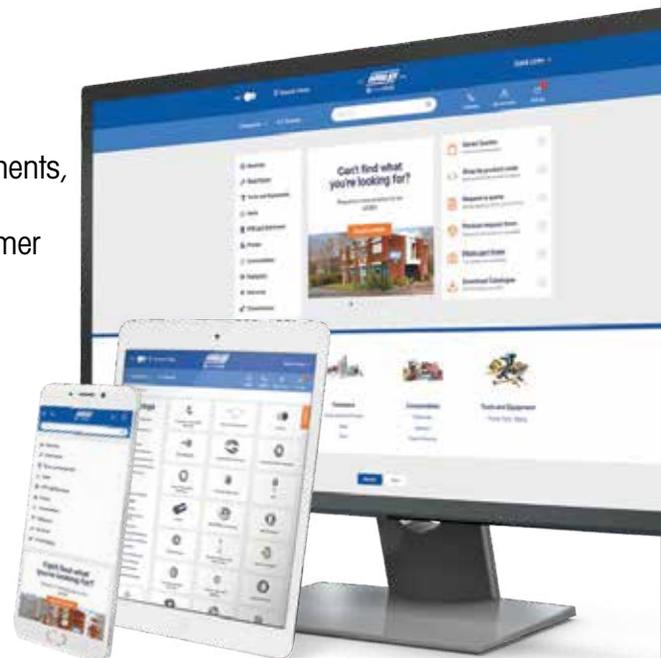

Available in variety of different models and configurations, all devices are driven by cloud-based software. Meaning there is no requirement for expensive or complicated software, server installations or maintenance. This enables these devices to be extremely cost-effective and easy to implement in comparison to previous generation systems.

## Online Ordering

Hayley SmartShop is an intuitive and highly flexible eCommerce platform designed to streamline the procurement of critical components, consumables and personal safety equipment. Designed to work in tandem with our branch network that offers industry-leading customer service and technical support.

- ✓ Streamline and audit your purchasing across multiple teams and locations
- ✓ Responsive technology enabling access through multiple internet enabled devices
- ✓ Set approval levels and purchasing restrictions
- ✓ Only contains agreed products and agreed pricing
- ✓ Ability to integrate via punch-out and any other protocol

Hayley 24/7 specialises in providing a comprehensive range of reactive and planned mechanical engineering services to a broad and diverse range of industry sectors.

## Industrial Gearbox Reconditioning

We overhaul and upgrade all types of industrial gearboxes and related drives from leading manufacturers up to 50 tonnes in-house.

- ✓ Same day collection, strip down and reporting
- ✓ Detailed inspection report and rebuild quote
- ✓ The supply of OEM parts
- ✓ Re-engineering of obsolete components
- ✓ OEM warranty
- ✓ Root cause failure analysis service
- ✓ Oil analysis service
- ✓ Vibration analysis service
- ✓ Asset management
- ✓ Run testing

## Fabrication

This include MIG, TIG and MMA welding in mild steel, stainless and aluminium materials, with all welders coded to BS EN 287.

- ✓ Bespoke capital equipment, machine tools bases
- ✓ Frames, chassis, electrical machine frames
- ✓ Generator skids, tanks, furnace casings
- ✓ Jigs, fixtures, special purpose tooling
- ✓ Hand railing, platforms, gates, sign gantries
- ✓ Ladders, bridges, conveyors
- ✓ Gearbox casings
- ✓ On-site welding
- ✓ Technical design and support
- ✓ Shaft and housing reclamation

## CNC Machining

We are proven specialists in providing breakdown machining, re-engineering (reverse engineering), reclamation and refurbishment work.

- ✓ CNC and conventional turning
- ✓ CNC and conventional milling
- ✓ Design / CAD / CAM
- ✓ Vertical boring
- ✓ CNC horizontal boring
- ✓ CNC machining centres
- ✓ Slotting
- ✓ Gear cutting
- ✓ Gear grinding
- ✓ Surface grinding
- ✓ Cylindrical grinding
- ✓ Spark eroding
- ✓ Metal spraying and specialist coatings
- ✓ Hard chromium plating

## Pump Repair

Our dedicated field-based pump engineers evaluate and complete all repair work on or off site, including a full testing procedure to ensure optimum operational efficiency. We offer complete transparency covering analysis, itemisation of replacement parts and test results.
