

"TESTING QUALITY"

## Calibration Services

Timely and accurate calibrations for your test machinery and portable load measuring devices

### Mobile Services at the AJT Workshop

We offer a range of services here at our workshop in the West Midlands. With many years experience, our technicians can calibrate, reset, and repair most makes and models of tension load links, compression load cells, and crane scales.

- We can calibrate up to 200 Tonnes in tension and up to 300 Tonnes in compression.
- All of our calibrations are carried out in accordance with ISO 7500-1 and are UKAS traceable by using our UKAS calibrated AJT reference load cells.
- We calibrate more accurately than the standard requires wherever possible, meaning you can be sure your test results are reliable.
- We offer one of the fastest calibration services on the market, with a normal turnaround time of 1-2 days.
- Express service available for a turnaround time of 2 hours per item.
- Worldwide service – we can return your equipment to any location.
- All repair work will be quoted for before any work commences, so you can be sure you have the price upfront with no surprises.

### Onsite Services

Our engineers can travel throughout the UK and worldwide to complete your calibrations on-site for virtually all makes and models of physical testing equipment up to 1400 Tonnes in Tension and 1000 Tonnes in Compression.

- Calibrations in accordance with ISO 7500-1:2018 – after your first calibration with us, we'll contact you every year to remind you to book in
- Reliable test results – we calibrate more accurately than the standard requires
- The AJT reference load cells we bring to your site to calibrate the machinery are all calibrated at the National Physical Laboratory to ISO 376:2011 which ensures your calibrations can be traced to National Standards
- Repair call outs for any AJT and non-AJT supplied machinery
- Bespoke maintenance and service plans
- Servicing for both digital and analogue units
- Wire rope press servicing and repair
- Upgrade paths for both hardware and software of your existing equipment
